Another friday night I m somewhere
F7M
A little drunk and worn out from the show
It s a hallway to a hotel room
                                    (G - Am7 - F6)
F7M
The truck s already rolling down the road
I find the lights take off my coat
                               (C - F7M)
I see here there just lying on the bed
She s seen me through my yesterdays
                               (C - G)
God knows tonight I m needing her again
        C9
She s the place I go
                         C9
When there s no where left to run to
        C9
               F9
She s the one I hold
                       Αm
                           G
When there s no one to hold on to
         Am
She s been with me late at night
          F7M
When I was drowning in the dark
   Am
She heard my every word
        F7M
When I was pouring out my heart
So I thank my lucky stars
For every crack scratch and scar on this guitar
```

She s given me her beset when I am at my worst

```
Αm
When I can t find the pieces
Fingers scratching in the dirt
She offers no forgiveness
Cause she likes to make it hurt
(Refrão)
Morning like a freight train
Last night still ringing in my head
Before today becomes tomorrow
                                 (G - Am7 - F6)
Tonight I know I ll do it all again
(Refrão)
    С
So I thank my lucky stars
                                           F9 C F7M C
For every crack scratch and scar on this guitar
```
