Hi Guys, I thought I would try my hand at some Tab. This song is one of the best. I just  
I did her justice! Have fun with it. Cheers :)

The first few verses don't have much guitar in them so you can just rest or pick the notes.

Again Today -Brandi Carlile

Broken sticks and broken stones  
Will turn to dust just like our bones  
It's words that hurt the most now isn't it  
Are you sad inside, are you home alone  
If I could just pick up the phone  
Maybe you could see a better day  
And you won't waste away  
under my watchful eye  
Because I'm your hero and you're my weakness

Who's gonna break my fall  
When the spinning starts  
The colors bleed together and fade  
Was it ever there at all  
Or have I lost my way  
The path of least resistance  
Is catching up with me again today

I'm broken down, not good enough  
The broken promises add up  
To twice their weight in tears which I have caused

I'm afraid to sink, I'm afraid to swim  
I'm sad to say I miss my friends  
I know that I'm supposed to step away  
But they need me to stay and keep a watchful eye  
On all my heroes and all their demons

But who's gonna break my fall  
When the spinning starts  
The colors bleed together and fade

Was it ever there at all  
Or have I lost my way  
The path of least resistance  
Is catching up with me again  
Not today
