Hi Guys, I thought I would try my hand at some Tab. This song is one of the best. I just

I did her justice! Have fun with it. Cheers :)

The first few verses don t have much guitar in them so you can just rest or pick the notes.

Again Today -Brandi Carlile

Broken sticks and broken stones
Will turn to dust just like our bones
It s words that hurt the most now isn t it
Are you sad inside, are you home alone
If I could just pick up the phone
Maybe you could see a better day
And you won t waste away
under my watchful eye
Because I m your hero and you re my weakness

Who s gonna break my fall
When the spinning starts
The colors bleed together and fade
Was it ever there at all
Or have I lost my way
The path of least resistance
Is catching up with me again today

I m broken down, not good enough
The broken promises add up
To twice their weight in tears which I have caused

I m afraid to sink, I m afraid to swim
I m sad to say I miss my friends
I know that I m supposed to step away
But they need me to stay and keep a watchful eye
On all my heroes and all their demons

But who s gonna break my fall When the spinning starts The colors bleed together and fade Was it ever there at all Or have I lost my way The path of least resistance Is catching up with me again Not today
