```
Provicence Canyon
Brent Cobb
{Intro]
G C/G
[Verse 1]
On a night like tonight
   C/G
                                           Em
It s easy to believe love really might be in the air
The temperature is perfect
 C/G
And I m pretty sure Spring won t be going anywhere
[Chorus]
So whaddya say we all go down to Providence Canyon?
Carve our names in the side of a red clay wall?
Somebody grab matches, I ll get the cooler
Why didn t we think of this sooner?
The night won t last forever, after all
[Verse 2]
                       C/G
Roll the windows down, kick your feet up on the dash
     Em
And ride away
                               C/G
Four wheels and a rusty frame is all we got, but just the same
It ll get us there
[Chorus]
                       G
Whaddya say we all go down to Providence Canyon?
Carve our names in the side of a red clay wall?
I got the wheel, somebody play an old song
That reminds us we re still young
The night won t last forever, after all
```

```
[Bridge]
      C C C G
After all stars fall bright there
I can t recall a more peaceful piece of ground
After all, tomorrow is unclear
After all these years
[Chorus]
                      G D
So whaddya say we all go down to Providence Canyon?
Carve our names in the side of a red clay wall?
Somebody grab matches, I ll get the cooler
Why didn t we think of this sooner?
[Outro]
                    G
The night won t last forever, after all
                      C/B Am
Oh the night won t last forever, after all
                      C/B
Oh the night can t last forever, after all
```
