

Little Cosmic Girl
Brett Dennen

When you're sleeping, safe from harm

What you do dream about when you're in my arms

All through the night the world was spinning

At the speed of light

Wars were fought, while I held you tight

You fell deep into an untamed sleep

When the moon began to creep

And the comets keep their promises

While the constellations weep

[Chorus:]

Little cosmic girl, isn't it a big world

Say, don't you worry about the little things

Don't let the daylight rob your dreams

Little cosmic girl, isn't it a wild world?

There is love and there is sadness

And there are miracles and madness

And we may never understand

No we may never understand

We are traveling in a minstrel's circus

In that caravan across the universe

All at once our bitter grudges

Were put to rest

Em

A7

Deaths were mourned, while births were blessed

Em

A7

Are we an accident in time

Em

A7

Or part of a grand design

C

D

Press your body close to mine

[Chorus x2]

Tell me do you believe, my little cosmic girl, in what you cannot see

Do you believe [3x] in what you cannot see, my little cosmic girl

[Repeats to fade out]
