

Shadowfeet

Brooke Fraser

Capo: 4

[Verse]

**Em7**     **A**             **D** **G**                     **D/F#** **Em7**  
Walking, stumbling on these shadowfeet  
           **A**                     **D**                     **G** **Em7**  
Toward home, a land that I ve never seen  
           **A**             **D**             **G**                     **D/F#** **Em7**  
I am changing: Less and less asleep  
           **A**                     **D**             **G** **D/F#**  
Made of different stuff than when I began  
**C**                                     **D**     **A**  
And I have sensed it all along  
**Em**                                     **A**  
Fast approaching is the day

[Chorus]

**G**                     **D**                     **A**  
When the world has fallen out from under me  
                                   **G**                     **D**     **A**  
I ll be found in you, still standing  
           **G**                     **D**                                     **F#7**  
When the sky rolls up and mountains fall on their knees  
                                   **G**  
When time and space are through  
           **D**                     **A**  
I ll be found in you

[Verse]

**Em7**     **A**             **D**             **G**                     **D/F#** **Em7**  
Thereâ€™s distraction buzzing in my head  
                                   **A**                     **D**                     **G** **Em7**  
Saying in the shadows it s easier to stay  
           **A**             **D**             **G**                     **D/F#** **Em7**  
But I ve heard rumours of true reality  
           **A**                     **G**  
Whispers of a well-lit way

[Chorus]

**G**                     **D**                     **A**  
When the world has fallen out from under me  
                                   **G**                     **D**     **A**  
I ll be found in you, still standing  
           **G**                     **D**                                     **F#7**  
When the sky rolls up and mountains fall on their knees  
                                   **G**  
When time and space are through

**D** **A**  
I ll be found in you

[Bridge]

**Em** **D** **A**  
You make all things new

[Chorus]

**G** **D** **A**  
When the world has fallen out from under me

**G** **D** **A**  
I ll be found in you, still standing

**G** **D** **F#7**  
When the sky rolls up and mountains fall on their knees

**G**  
When time and space are through

**D** **A**  
I ll be found in you

[Chorus 2]

**G** **D** **A**  
When the world has fallen out from under me

**G** **D** **A**  
I ll be found in you, still standing

**G** **D** **F#7**  
Every fear and accusation under my feet

**G**  
When time and space are through

**D** **A**  
I ll be found in you
