Capo 3st Fret

**C**                    **Em**                    **F**  
A bang then stardust in your eyes  
                  **Fm**                    **C**  
A billion years for just this night  
                  **G**                    **C**                    **G**  
In a way it will be alright  
**C**                    **Em**                    **F**  
A blackness then the light of a million stars  
                  **Fm**                    **C**  
As you slip into in my car  
                  **G**                    **C**                    **G**  
The evening sky strikes sparks

Chorus:

**F**                    **C**  
This life, this life and then the next  
                  **F**  
With you I have been blessed  
                  **C**                    **G**  
What more can you expect

**C**                    **Em**                    **F**  
At night at my telescope alone  
                  **Fm**                    **C**  
This emptiness I ve roamed  
**G**                    **C**                    **G**  
Searching for a home  
**C**                    **Em**                    **F**  
The stars, a brief string of shining charms  
                  **Fm**  
Rushing in right out of our arms  
                  **C**                    **G**  
Into the drifting dark

Chorus:

**F**                    **C**

This life, this life and then the next

**F**

With you I have been blessed

**C G**

What more can you expect

**F**

**C**

This life, this life and then the next

**F**

I finger the hem of your dress

**C G**

My universe at rest

**Am**

**Em**

We reach for starlight all night long

**F**

But gravity is too strong

**C**

Chained to this earth we go on and on and on and on and on

**Am**

**C**

Then a million sighs cresting were you stood

**F**

A beauty in the neighborhood

**C**

**G**

This lonely planet never looked so good

Chorus:

**F**

**C**

This life, this life and then the next

**F**

With you I have been blessed

**C G**

What more can you expect

**F**

**C**

This life, this life and then the next

**F**

I finger the hem of your dress

**C G**

My universe at rest
