(intro) **B F# G#m F# B F# C#m E**

(verso 1)
```
    G#m                          B
I was the one to call the shots
                                 E
Dreamed my dreams, heart and soul
                  B
Answered only to myself
                      F#
Never giving up control
          G#m      F#                  C#m     F#
Until the one day, that brought me to my knees
               G#m F#       E
And I would never be the same
```

(refrão)
```
B                           F#
Once upon a time the story goes
    G#m                   F#        C#m
I laid it all down and let it go
                  E   F#
To lose it all, to lose it all
    B                           F#
I took a step of faith and said goodbye
G#m                   F#        C#m
Everything I had I left behind
               E
To find true life
G#m             F#                 E
All I longed for I found finally
                 B F# G#m F# C#m E
At the end of me
```

(verso 2)
```
G#m                             B

                            E
The selfish soul, the emptiness
                            B
Love moved in, they ve been replaced
                       F#
That old life is laid to rest
        G#m F#               C#m     F#
Now the new me is stronger day by day
        G#m    F#      E
I will never be the same
