Shier Me Timber
Cage the Elephant
Intro: D F#m A#m A x2
Timber shakes these trails, they are derailed
Phony, false and frail
A#m
An empty ocean
Lost our way with no direction home
Golden needles, names we take in vain
F#m
Find it harder to remain
A#m
No nothing sacred
Still waiting on that explanation
Right before my eyes
I saw the whole world lose control
The whole world lost control
Before my eyes
I fell through the floor
I couldn t take it anymore
A#m
I can t take this anymore
                             Α
It breaks my mind
Hold her dirty hands over the flames
F#m
Getting pleasure from the pain
A#m
Softly screaming
The pistol that she raised has spoken
Golden needles, names we take in vain
Find it harder to remain
```

```
Nothing sacred
Still waiting on that explanation
Right before my eyes
I saw the whole world lose control
The whole world lost control
Before my eyes
I fell through the floor
I couldn t take it anymore
A#m
I can t take this anymore
It breaks my mind
                          A#m
Everything I thought I knew fell to the side
Time went on and on, I couldn t see past my own eyes
Past my eyes, past my eyes, past my eyes
Right before my eyes
I saw the whole world lose control
A#m
The whole world lost control
Before my eyes
I fell through the floor
I couldn t take it anymore
A#m
I can t take this anymore
Fix my mind
```
