[Verse 3]
                G7 Cm
Cm
O young men from Canada,
Young women from various lands
When you travel cross Canada
Search for my bones
Along every mile of the great railways
Stretching from east to west
                                             Fm
In every mine in British Columbia and in the great Canadian Shield
In the canals and forests of Quebec
And across the massed prairies
Where the grain is plentiful,
                       Cm7
                              Gm7
                                     Cm7
                                            Gm7
There you will find my bones
[Verse 4]
                      G7
The time has come and it is now,
We must take Canada as our own
The land of the toilers,
                                 G7
Proletarians from east, west and north
                          Α
Of small farmers and small fishermen
And of the native people
And of those who fight for freedom, independence, and democracy
We must get out of this crisis
Of the capitalist class
In the struggle for socialism,
                              Gm7
                                     Cm7
                                            Gm7
There you will find my bones
