```
Hey Little One
Capital Lights
Artist: Capital Lights
Song: Hey Little One
Tuning: Standard E (Capo 1)
[Intro]: G D C G D x2
[Verse 1]:
 What if love could never fade?
Our stomachs always kept the butterflies we had on our first date
Then you'd have never slipped away
Whatâ\inMs now a cloudless empty sky would signify a brighter day
 How do you know when it's time to give in?
 How do you know when it's time?
[Chorus]:
                              C
                                                   G
Hey, little one, here's to a moment of life in a year come and gone
I'll miss you my friend; I'll learn to stand on my own â€~til I find love
again
                G
C
Here's to good times, little one
              G
Here's to goodbye, little one
                 Em
                             D
 Here's to the year you were my little one
[Verse 2]:
```

G D

Warmer weather eases pain
C G D

But you gave the coldest shoulder as you showed that seasons change
G D

```
Just a year ago today
                                                                    \mathbf{E}\mathbf{m}
You'd brought hope for warmer winters; New York City last December paved the
way
How do you know when it's time to give in?
 How do you know when it's time?
[Chorus] (Omit last G chord)
[Bridge]:
Em
 The time to overcome is well overdue
           С
                 G
Out with the old, independently new
                      G
                                   D
But I'd rather be depressed than happy without you
Oh God, please carry me through
Ohooh ohooh ohooh ohoohwooah
[Chorus 2]:
Hey, little one, here's to a moment of life in a year come and gone
Hey, little one, here \hat{a} \in \mathbb{T}^m s to a moment of life in a year come and gone
                                         D
 I'll miss you my friend; I'll learn to stand on my own â€~til I find love
again
Here's to good times, little one
Here's to goodbye, little one
                 F#m
 Here's to the year you were my little one
        F#m
Ohooh ohooh ohoohwooah
   E
          F#m
 Ohooh ohooh ohoohwooah
           F#m
 Ohooh ohooh ohoohwooh ohoohwoah
```

[Outro]:

What if this was just a dream?

D

A

E

When I awakened from this nightmare you were lying next to me?

A

E

Things would change if that were true

Rather than holding onto memories, $\hat{\text{la}} \in \mathbb{M}$ be holding onto you
