

Build Around Your Heart A Wall
Cary Ann Hearst

A very rough attempt; every C has various simple hammer-ons and pull-offs to country it
up a bit. Enjoy, this is a class song from a class album.

CAPO 4

C#

In a vacant old park

C#

I watched from the dark

F#

The old church was on fire

F#m

I buried my lighter

C# F Bbm

So no one could tell I was runnin

F# F#m C#

God forgive me but he had it comin

C#

She was barely fifteen

C#

midwest town sleepy scene

F#

I was two grades above her

F#m

Completely in love with her

C# F Bbm

One look from those eyes I was done in

F# F#m C#

God forgive me but he had it comin

Eb G#

It was deadly crooked fangs

C# F Bbm

But outside a church-bell clangs

F# C# G# Bbm

Well rise and fall, curtain call

Eb G#

Build around your heart a wall

F# C# G# Bbm

Brick and stone both thick and tall

Eb G#

Build around your heart a wall

With my hand on her head

In a hospital bed

In the secrets she kept

That would lead to her death

Well the fucker had took what he wanted
And I promised he d get what was comin
But she never made a sound
When he pushed her to the ground
Well rise and fall, curtain call
Build around your heart a wall
Of brick and stone both thick and tall
Build around your heart a wall

I tried to keep breathin
As the last car was leavin
Drank myself courageous
Crept behind the stage
Towards the target for which I was gunnin
God forgive me but he had it comin
It was deadly crooked fangs
But outside a church-bell clangs
Well rise and fall, curtain call
Build around your heart a wall
Brick and stone both thick and tall
Build around your heart a wall
Build around your heart a wall
