Loved Me Back To Life
Celine Dion

Celine Dion - Loved Me Back To Life

[Celine]
```
    F#                  B
```
I was walking pisssed inside my head
```
  F#
```
You couldnâ€™t get out
```
    B
```
Turn the lights down
```
    F#                    B
```
Voices inside are so loud.

```
  F#
```
You did a jump start
```
 B
```
Gotta turn it on
```
 F#                  B
```
I couldnâ€™t feel, I wish that I could disappear
```
 F#                  B
```
The voices inside are so real.

```
  F#                   C#
```
But you stood by my side.
```
 C#                  C#
```
Night after night, night after night.
```
                 F#        F#
```
You loved me back to life, life
```
    F#                 C#
```
From the darkness the wait is over.
```
             F#             F#
```
You loved me back to life, life
```
 F#                 C#
```
From the darkness, weâ€™re lovers again tonight.
```
 F#               F#                      F#
```
Back to life, back to life, back to life, back to life, yeah

```
F#                             B
```
Warm me up one touch Iâ€™m on fire
```
 F#                              B
```
Love me back to life, back to life, but I died.
```
F#                              B
```
The voices inside were so quiet.

```
  F#                   C#
```
But you stood by my side.
```
 C#                 C#
```
Night after night, night after night.

```
                F#          F#
You loved me back to life, life
      F#                    C#
From the darkness the wait is over.
                  F#              F#
You loved me back to life, life
   F#                    C#
From the darkness, weâ€™re lovers again tonight.
.

      F#                          B
Strong hands, thick skin, and an open heart
   F#                          B
You saw through the pain, saw through the mask
   F#                            B
You never gave up on me, yeah

                F#          F#
You loved me back to life, life
      F#                        C#
From the darkness the wait is over.
                  F#              F#
You loved me back to life, life
   F#                        C#
From the darkness, weâ€™re lovers again tonight.
```
