

**I Belong In Your Arms**  
**Chairlift**

\* NOTES: The original song is in the key of F but I found that playing this song in G would be much easier and lighter sounding on the acoustic guitar. Use the built-in UG transpose tool if you need to view the chords in F. \*

- Standard Tuning
- No capo

The little bass lick that can be heard in the chorus is played like this on the guitar,  
you may combine it with the rest of the G chord if you want.
