|This tab isn't necessarily for people who want to play the song acoustic. I just made this as an outline so people can finally figure out all weird chord progressions that are going on in the song. If you do decide to use this as a guide to play it acoustic, I warn you, it may sound weird.|

|Key|

\* - Play twice

? - Not sure if major or minor. Could be diminished or some weird crap. If you don't know music theory just play a power chord or something.

To see through the night.
