

## Walk Away

Chris Clouse

Song: Walk Away

Artist: Chris Clouse

I saw no one made a tab for this awesome song so i decided to do one. My first tab

so pls comment and rate! Thanks!

Intro, verse, chorus: **Am** x3 (together fast) **F** (hold for awhile)

**C** x3 (together fast) **G** (hold for awhile)

(Intro x3)

(Verse)

Walked away

Could ve been a little bit wiser  
Should ve been a millionaire  
Could have held you a whole lot tighter  
Acted like I did not care

I want to feel like I m somewhere  
In the middle of this  
I want to feel like I m not just slipping away

(Chorus)

So I walked away, walked away  
Because I heard you say that it ll never be the same  
I shoulda walked away, walked away  
The voice inside me shouts out loud  
The silence feels more silent now

Walked away

Walked away

(Verse)

Tried to step a little bit calmer  
Can t shock the passerbys  
These tingles within her vision  
A pushing child will never cry  
My pillow lies right inside this rushing ferris wheel  
I want to step up instead of spinning in place

For the instrumental, not really sure but i play it with **Am** repaeatedly. Sorry guitarists!

(Chorus)

**Am** **C**

I often wonder what s the truth

**Am** **F**  
Where not to go, what not to do  
**Am** **Dm** ?  
So many days inside this carnival wheel  
**Am** **Ab** (hold)  
So many ways you can move  
**C**  
Still you re standing still

(Chorus x2)

Coda: Repeat intro a few times before ending once with an intro played slow
