Take Back Yesterday
Christian Ingebrigtsen

```
G/B                            Am7
   Today is just another day
                               F7

But itâ€™s lost without you here with me
                                D
Timeâ€™s become my enemy
G/B                                  Am7
Thatâ€™s the prize I have to pay
                               F7
For fighting with my sanity
                            D
I know thereâ€™s no apology
            G/B
But Iâ€™m here for you
          Am7
I still care for you
      F7
I swear to you
             D
I never meant to hurt you
G/B                                          Em
     How can I ever really make it up to you?
                               Am7
Please donâ€™t tell me itâ€™s too late
                   F7
I wish I could say Iâ€™m sorry
                    G/B
And make it all go away
                                      Em
How can I let you know how I feel about you
                                 Am7
Without messing up all the words?
                   F7
Itâ€™s too late to say Iâ€™m sorry, or to
                 G/B
Take back yesterday
 G/B                            Am7
    Itâ€™s never easy to explain
                              F7
How you feel when youâ€™re confronted with
                    D
Things you never really did
G/B                            Am7
    I hope the joy we had remains
                                 F7
In your memories of who we were
```

```
                                      D
When we could not be happier
 G/B
 Coz Iâ€™m here for you
          Am7
I still care for you
    F7
I swear to you
          D
I never meant to hurt you
 G/B                                              Em
    How can I ever really make it up to you?
                              Am7
Please donâ€™t tell me itâ€™s too late
                          F7
I wish I could say Iâ€™m sorry
                      G/B
And make it all go away

                                      Em
How can I let you know how I feel about you
                              Am7
Without messing up all the words?
                      F7
Itâ€™s too late to say Iâ€™m sorry, or to
              G/B
Take back yesterday

BRIDGE
G/B                          Em                      Am7                  F7
   The times weâ€™ve had brought happiness into my life
Dm7          F7              Am7                  D
   The hurt I caused you cuts me like a knife
G/B
Oh woa oh
G/B                                              Em
    How can I ever really make it up to you?
                              Am7
Please donâ€™t tell me itâ€™s too late
                      F7
I wish I could say Iâ€™m sorry
                      G/B
And make it all go away
                                      Em
How can I let you know how I feel about you
                              Am7
Without messing up all the words?
                      F7
Itâ€™s too late to say Iâ€™m sorry, or to
              G/B
