Hope For Now City and Colour

City And Colour Little Hell Hope For Now

Am

this hallway s dark and empty

D

D

D

D

D

just miles and miles of endless road

Am

I ve got a sickness pounding in my head

I m at the mercy of the ghosts

Am

But what it would take to live

As if I would not another day

To live without despair

And to be without another desdain

CHORUS:

F G

How can I instill such hope

Am

But be left with none of my own?

what if I could sing

G

Just one song

Am D

D

And it might save somebody s life

Am

I sought after

D

after reasons to stay

i was lost

i was lost

Then the sky turned black

```
D
And the rains poured down
Am
I was waiting
                      F
                                          D
waiting to be found
oh, no
Chorus:
                                          G
How can I instill such hope
                                          D
              Am
But be left with none of my own?
what if I could sing
Just one song
                                              D
                     Am
And it might save somebody s life
Am
then I would sing
All that I can sing
Because that is when
                                                  D
When I feel that I m not counting time
Am
Oh, and I sing
                         D
All that I can sing
Maybe just for the moment
                                         D
Things would seem all right
F
                    G
Oh, and I sing
Oh, and I sing
                    G
Oh, and I sing
Am
                 D
Oh, and I sing
```
