

Chemicals Collide
Cloud Cult

I tabbed this on a whim, so it may be a bit sketchy.
It should be good unless I decided to put a wrong chord somewhere...
And if you decide to tab out the solo/interlude whatever I ll shove it right in
to make
supreme tab.

**Most of the song is fingerpicked in some pattern that I didn t bother to tab
out (or
out, for that matter). Just hit the root first and pick random strings from
there and it
like you know what you re doing.
