Coast - The Beat of You

Tuning: Standard Tuning

Hi, I already made a tab which had the chords and the tabs for this song, but I thought that if people just wanted to know the chords, I'd make a chords version, also because the tab version doesn't show how the chords are. Again then, this is one of my favorite songs from one of my favorite bands, Coast. I really want them to get more known, because they are absolutely amazing, and no one has made chords/tabs for any of their songs, so I thought that I'd do it. So yeah! :)
You can still check out the tab version of it, on that one there is a LOT more detail about everything, but this is for the people who want to know the chords for the whole song! :)
It pretty much uses C, D, G and Em through the whole song. Am a couple of times. So, enjoy and comment/email me if you have a correction or if you like it! :)
