Low
Coldplay

(intro) **C   Am   Em   A   C   C**

Em
You see the world in black
  Bm
and white
C   **Am**
No colour or light
Em   **Bm**
You think you ll never get it right
C   **Am**
But you re wrong... you might

Em   **Bm**
The sky could fall, could fall on me
C   **Am**
They re passing on the seas
Em   **Am**
But you need more, need more to me
C   **Am**   **Em**
Than any colour I can see

C   **Am**
All you ever wanted was love
                    Em
But you never looked hard enough
                 A
it s never gonna give itself up
C   **Am**
All you ever wanted to be
               Em
Living in perfect symmetry
            A
Nothing is as down or old as us
C
as us

Em   **Bm**
You see the world in black and white
C   **Am**
Not painted right
Em   **Bm**
You see no meaning to your life
C   **Am**   **Em**
You should try
C   **Am**   **Em**
You should try

```
C                               Am
And all you ever wanted was love
                                Em
but you never looked hard enough
                                A
it s never gonna give itself up

C                               Am
All you ever wanted to be
                                Em
Living in perfect symmetry
                                A
Nothing is as down or old as us

C                               Am
And don t you wanna see it come soon
                                Em
Floating in a big white balloon
                                A
Given on your own silver spoon

C                               Am
Don t you wanna see it come down
                                Em
Death is throwing your arms around
                                A
Say it in a moment too soon

 G              C
 Cause I feel low
G               C
 Cause I feel low
Ohhhhhhhhhh
G           C
Yeah I feel low
 Am
Oh no
Ohhhhhhhhhh

G  C  G  C  G  C  Am
Ohhhhhhhhhh
G                   C
 Cause I feel low
Ahhhhhhhhhh
G               C
 Cause I feel low
Ahhhhhhhhhh
G               C
But I feel low
Am
Oh no
        G
Ohhhhhhhhhh
```
