What If
Coldplay

```
F#m       A              Bm
what if there was no light
E                     D
nothing wrong, nothing right
F#m       A              Bm
what if there was no time
E                   D
and no reason or rhyme
D/B                    E
what if you should decide
          F#m           D              E
that you don t want me there by your side
          F#m           D              E
that you don t want me there in your life

F#m       A              Bm
what if I got it wrong
E              D
and no poem or song
F#m         A                      Bm
could put right what I got wrong
E                     D
or make you feel I belong
D/B                    E
what if you should decide
          F#m           D              E
that you don t want me there by your side
          F#m           D              E
that you don t want me there in your life

D               Bm
o o oh that s right
F#m                              E
let s take a breath and jump over the side
D               Bm
o o oh that s right
F#m                              E
how can you know it when you don t even try
D               Bm
o o oh that s right

F#m       A              Bm
every step that you take
E                          D
could be your biggest mistake
```

```
F#m         A                    Bm
it could bend or it could break
E                       D
that s the risk that you take
D/B                 E
what if you should decide
        F#m             D              E
that you don t want me there in your life
        F#m             D              E
that you don t want me there by your side

D               Bm
o o oh that s right
F#m                     E
let s take a breath jump over the side
D               Bm
o o oh that s right
F#m                         E
how can t you know it when you don t even try
G               D       E
o o oh that s right

D               Bm
o o oh that s right
F#m                     E
let s take a breath jump over the side
D               Bm
o o oh that s right
F#m                             E
they say you know that darkness always turns into light
G               D       E  F#m
oh-oh-oh that s right
```
