E	111-333333

Order: 2xVerse - Chorus - 4xVerse - Chorus - Solo (2xVerse + Chorus) - 2xVerse - 2xChorus

So, this are the tabs, but I still couldn t figure the solo out...
Whatever, you also can play the verse 2 times and the chorus during the solo.
It s kinda the same...

After the very last chorus you just have to play the last chord:
This is simply just the G chord which you hit softly one last time and let fade away...

Well, and here s just the chord version for you...
