The verse chords follow the intro.

I am not going to put the **Csus2add#11** and **G/B** after the **Csus2** and **Gmaj7/B** respectively

It s so that chords won t look so messy.

Play the chord after only if there s a () infront of **Csus2** and **Gmaj7B** like so

Csus() **Gmaj7/B()**

But I still play them
