

**Good Girls**  
**Crystal Fighters**

*verse 1*

G                      D                      C                      G      D      C  
Do you ever get tired of feeling alone?  
G                      D                      C                      G      D      C  
When the lights come on and there s no one at home  
C                      E                      D  
She said she wanted to break out, to break outta here  
C                      G      C      G      C      D  
And I believed every move she made (she made)

*Pre-Chorus 1*

C                      E                      D  
She said she knew an easier way outta here  
C                      G      C      G      C      D  
And I believed every word she said

G                      D                      C  
I woke up this morning, had a funny feeling  
G                      D                      C  
Last thing I remember we were beautiful  
G                      D                      C  
The sun came up and God, she had left me nothing  
G                      D                      C  
Where have all the good girls gone? Whoa, whoa  
G                      D                      C  
Where have all the good girls gone?

*verse 2*

G                      D                      C                      G      D      C  
Hold tight, my love, and the stars will appear  
G                      D                      C                      G      D      C  
All the words she said when she shot me right here

*Pre-Chorus 2*

C                      E                      D  
She said she knew an easier way outta here  
C                      G      C      G      C      D  
And I believed every word she said

G                      D                      C
