S.F. Bar 69

by dada from the album American Highway Flower

transcribed by Jeff Matson (jdm7@cornell.edu)

This is a very rough version, with only basic chords.

Verse:

Em Em Em(?) Em D C(9)

the Em(?) chord is 020000. I just don t know the name of this chord.

Chorus:

D D(4) C(?) C(9) Em

move the bass note around on the Em in the chorus to make it sound better.

I don t know the names of all these chords, but i play the Em progression as

022000 2x2000 3x2000 x02000

the C(?) chord is x32030.

Chords:

Em 022000
D xx0232
C(9) x32033
D(4) xx0233

Lyrics:

Long lean piece of ice
Thin and hard think what it will do
I can slice and I will pour it to you
Drip drop drip
Reflective properties, I see you

My mind stops and stutters
My mind stops
Please can I kiss your kneecaps?

Sun burns itself out

I look around and notice all the dogs
In line to howl so loud so long
For just one night
What the hell is your name?

I m numb, dumbed down
On a leash that chokes so hard
My life fades to blue

And the hand that holds my leash
Is so strong that it s useless to struggle
Useless to catch the one breath that starts me down
To freedom
Unknown to the bone
Without taste, past disgrace
White pasty face
Please don t notice me my goddess
