G#
My consciousness wakes
C#9
As the sun light breaks
                              C#9
Your face appears in my sleepy mind
Im not sure where to go
C#9
I wanna go back to bed
G#
Turn the room to black
C#9
But there you are in my head
Eb9
I turn up, I turn up the radio
So loud that it drags you out
Eb9
                           C#9
                                              Eb
Your voice is in my head saying I wont let you down
But, I cant love you now
Eb9
And I dont know how
                       C#9
Youre like a beautiful disease, taking over inside of me
When I close my eyes
Eb9
Try to sleep at night
C#9
```

```
C#9
                     Eb
So I cant love you, love you now
G#
I gotta leave this place
C#9
When all I see here is your face
                                        C#9
Im getting in my car, never looking back
Youre the worst thing for me
Maybe youre all I really need
G#
                                  C#9
All I know is this were not our time
I turn up, I turn up the radio

So loud that it drags you out
                     C#9
                                   Eb
Your voice is in my head but I gotta leave this town
G#
I cant love you now
Eb9
And I dont know how
C#9
                        C#9
                                            Eb9
Youre like a beautiful disease, taking over inside of me
                  Eb9
When I close my eyes, Try to sleep at night
Youre always draggin me down
          Eb9
                      Eb
                                 G#
So I cant love you, love you now
C#9
So tell me, tell me
Eb9
To come back to sleep again

And don't let me, let me
G#
Be here waiting til its over
