Alone Together Dan + Shay

C Dm

I couldn t help but notice you were sitting by yourself

Dropping limes in a Corona like

G

You re trying to get over somebody else

C Dm

It s funny how you re story sounds a little like mine ${\bf Am}$

Oh, cause I ve been at a table with a

G

Bottle peeling labels to pass the time

C

We can be blue eyes and neon light

Dm

Singing them sad up songs all night

Am

We can say goodbye, just head home

G

But, if we re going to be alone

C

We should be alone together

Dm Am

Kissing over there in the corner where nobody else can see

G

Keeping each other company

C

We should be alone together

Dm

Leaning up against my car door

Δm

G

Parked outside on the street, where it s just you and me

C

We should be alone together

C Dm

I couldn t help but notice you could use another drink

Yeah, I don t wanna leave ya

G

And it s two for one Tequila so what you think?

C

We can be blue eyes and neon light

Dm

```
Singing them sad up songs all night
We can say goodbye, just head home
But, if we re going to be alone
We should be alone together
                                                        Am
Kissing over there in the corner where nobody else can see
Keeping each other company
We should be alone together
Leaning up against my car door
Parked outside on the street, where it s just you and me
                   C
We should be alone together
                   Dm
We should be alone together
We should be alone together, oh yeah
We should be alone together
                                                       G
Over there in the corner where nobody else can see
We should be alone together
                                                        Αm
Kissing over there in the corner where nobody else can see
Keeping each other company
We should be alone together
Leaning up against my car door
Parked outside on the street, where it s just you and me
We should be alone together
We should be alone together
We should be alone together, oh yeah
We should be alone together
```
