

All Over Me  
Danger Flowers

**Bm**            **A**                    **G**                    **D**  
The space between what's wrong and right,  
**Bm**            **A**                    **G**    **D**  
You will find me waiting for you.  
**Bm**            **A**                    **G**                    **D**  
All your fortresses go down in the night,  
**Bm**            **A**                    **G**  
To the dawn I'll see you through.

CHORUS

**Bm**            **A**                    **G**  
Cause I know, that you know,  
                         **D**            **Bm**  
You're all over me now.  
                         **A**                    **G**  
And it's clear, you will show,  
                         **D**                    **Bm**  
And your curtains will go.  
                         **A**                    **Gm**  
But if your heart is cold,  
                         **A**                    **Gm**  
My sheets are warm,  
                         **A**  
I will shelter you,  
**G**                            **D**  
Through the storm.  
**Bm**            **A**  
I will shelter you,  
**G**  
All through the storm.
