Great song off the Fear Yourself album. The chord progression is really simple, it just reverses every two lines. Enjoy.

G Am On top of a mountain top I stood and thought one day С Αm I really could see a lot and if I had my way Am A lazy young sod, I was so deep in love those days As if there was nothing left, but only love I crave And so I didn t know as much, her loving touch amazed Αm I was so gone with love the alphabet was a haze C So alone as she pulls away the funeral truck, I cried I watched the clouds dissapear like a lost christmas that day Am And now I can t seem to cope but only hope it be okay If I could just see her again and we could be friends like way back when It s as if I m already dead and in my grave I lay Am If only her love could save me now, and if somehow she d stay...
