-jimmy nothin-

psycho nightmare by daniel johnston yo.

```
daniel ventures into the key of c for this fabulously punky number.
C
it s just another psycho nightmare
so don t you forget
                                С
                                       G
you ve always been the teachers pet
                 F
its a tired and slow song baby
so don t be upset
just remember the future has
              G
not happened yet
               F
every little thing you dream of
could be made true
every shining thing you joke up
could happen to you.
```

do it over and over again. the words in the chorus are worng.
