

By My Side
David Choi

So I basically just took this chording from someone s that was already up. But I noticed that a lot of David Choi s songs use different chords than normal, so I thought I d add in some tabs to show what chords he really uses in his songs.

	E	Abm	F#m	B	A	C#m
E	---0-----0-----0-----0-----0-----0-----					
B	---0-----0-----0-----0-----0-----0-----					
G	---9-----4-----2-----8-----6-----6-----					
D	---9-----4-----2-----9-----7-----6-----					
A	---7-----x-----x-----9-----7-----4-----					
E	---0-----4-----2-----7-----5-----x-----					

Also, he does a quick transition from his A chord to his **F#m** chord. I looks like this:

	A	Abm	F#m
E	---0-----0-----0-----		
B	---0-----0-----0-----		
G	---6-----4-----2-----		
D	---7-----4-----2-----		
A	---7-----x-----x-----		
E	---5-----4-----2-----		

When he s using the Abm as a transition chord [only strumming it once on the 4th beat] I marked it with a star[*] to make it a little bit easier to understand. I d hope you can figure it out without it, but if it helps, there ya go :P
