Turn Time Off
David Myles

Guitar:
Capo 1 (Play all chords without #)

Intro: **C#**

Verse 1:

```
   C#                          F#
Oh love, your eyes shine brighter than the stars above
              A#m                                      G#
and I don t have to search to find you cause I m lying here beside you
  F#      G#
tonight
             C#                          F#
and it s nights like tonight that remind just how fast time flies
            A#m
I can t think of anything better
                 G#                          F#          G#
I could make this last forever I d try
```

Chorus:

```
                    F#    G#                  C#
I m gonna  tell the world to stop spinning around
                    F#                           G#        C#
I m gonna tell the stars to keep shining and the sun to stay down
           F#                        G#              C#
 Cause a night like this hasn t come around in so long
              C#  G#  A#m          G#         C#
I m gonna turn time off, then I d turn you on
```

Verse 2:

```
         C#                          F#
 Cause I ve been away and I ve got so much that I d like to say
         A#m                                      G#
but I m going to leave it in my head, I m going to leave it to be said on
  F#          G#
another day
           C#
 Cause we both have better things to do
             F#
and I feel just like I did when our love was brand new
           A#m                      G#                      F#      G#
I don t have to say a word for my love to be heard by you
```

Chorus:
```
                   F#    G#                    C#
I m gonna tell the world to stop spinning around
                     F#                              G#      C#
I m gonna tell the stars to keep shining and the sun to stay down
          F#                     G#              C#
 Cause a night like this hasn t come around in so long
            C#  G#  A#m              G#        C#
I m gonna turn time off, then I d turn you on
            C#  G#  A#m              G#        C#
I m gonna turn time off, then I d turn you on
```

Interlude: **C# F# A#m G# F# G#**

Chorus:
```
                   F#    G#                    C#
I m gonna  tell the world to stop spinning around
                     F#                              G#      C#
I m gonna tell the stars to keep shining and the sun to stay down
          F#                     G#              C#
 Cause a night like this hasn t come around in so long
          C#  G#  A#m              G#        C#
I m gonna turn time off, then I d turn you on
          C#  G#  A#m              G#        C#
I m gonna turn time off, then I d turn you on
          C#  G#  A#m              G#        C#
I m gonna turn time off, then I d turn you on
          C#  G#  A#m              G#        C#
I m gonna turn time off, then I d turn you on
```
