```

Repeat 2x then play the intro riff 4x ending on 555 the last time.
Then the verse riff and chorus.. After the chorus, there s
a break... There s not much music here, some acoustic strumming or
or whatever.. I just switch to a clean channel and play this. It
sounds fine. If you want to strum and pick that sounds good too, I m
just putting this in for fun... Just play around with it.
