

**Speeding Cars**  
**Deaf Havana**

Verse 1:

I saw a death at the bottom of White Hill Road  
Careless drive for a suicide note  
I turned around and I closed my eye  
But the speeding cars never did collide  
Yeah the speeding cars never did collide...

Verse 2:

When did I get so lost inside my head  
Im only 22 but im going on dead  
So i put my faith in my grandfathers car  
Piece by piece just lose what ive got  
Yeah piece by piece just lose all ive got

Chorus:

Its been a bad few weeks  
But im still hoping I  
Can get back on my feet  
I just need a little time  
Because my mother told me to loosen up  
And stop living in my head  
Its been a bad few weeks  
So Ill just drive myself to sleep instead

Break:

**F, C, F**

Verse 3:

I think I left my mind somewhere in the land  
I see these walls with the blood from my hand  
I dont sleep since I got home  
I see the knife to take me for all that i own  
Because I view my life through a telescope  
That Ive built from a bottle and a slippery slope  
You see I cant drown to save my life  
But Im holding on for a day that i might

Chorus:

Its been a bad few weeks  
But im still hoping I  
Can get back on my feet  
I just need a little time  
Because my mother told me to loosen up  
And stop living in my head  
Its been a bad few weeks  
So Ill just drive myself to sleep instead

Bridge:

Because I m always all the time  
Sick of trying to find  
An answer in these darkened city bars  
In the back rooms where we lose our hope  
The drinks that turn good men to ghosts  
And yeah we re all left wondering who we are

Whoaa
