

Trail In Life
Dean Brody

Trail in Life

Capo 1

Was a may full moon we parked the car
And i sang you a song i wrote on my guitar
oh i have kissed many times since then
but that first one is special, one you dont forget
if i had asked you then youd probably took my ring
but time and distance have a way of changing things

and sometimes i wonder what it would happen like
if we had wandered the same path in life
tonight if your out there looking up at the same moon
girl i hope that your trail in life has been good to you

college days, frat house nights
you were more than just a bunch of rowdy friends of mine
you made leaving home not as hard to bear
yeah we swore we would stick together til we were in rocking chairs

we all kinda scattered getting our lives in gear
phone calls went from weeks to months to i aint heard in years

and sometimes I wonder what it would happen like
if we had wandered the same path in life
we d still smoke cigars when the wild cats beat O U
and friends i hope that your trail in life has been good to you

when i was born, they said you cried
when you signed those papers and kissed me goodbye
too young to know how to raise me up,
so you let me go and start this world in a house of love.
i was 12 years old when daddy sat me down
and told me of a brave girl that i should know about

and sometimes I wonder what it would happen like
if we had wandered the same path in life

i think id make you proud of the boy you never knew
and god i hope that your trail in life has been good to you

D

A

D

and someday i know this old trail in life will lead wind back to you
