Gone without me to the other side, must I follow leave the old me behind

Change, it melts us down and moulds us round

Into who we are, into who we are, into who we are.

10 000 miles away from the place you used to call home sweet home

### Bridge

**Em**                    **Cadd9**  
Jokes you used to tell, the way things used to smell,  
**G**                    **Em/G**  
Expressions on your face wouldnâ€™t want it any other way  
**Em**                    **Cadd9**  
Iâ€™d whisper in your ear, always hold you near,  
**G**                    **Em/G**  
we were heading for the ground, didnâ€™t ever want any of it to change.

**Em**                    **Cadd9**  
All those happy thoughts, I never did give up  
**G**                    **Em/G**  
Always tried so hard until reality walked in my door  
**Em**                    **Cadd9**  
The lighting it grew thin, the flame it grew too dim.  
**G**                    **Em/G**  
Do you wanna change the real person that you are today?
