```
E                                     B
Heard this line one time about trying to save the world,
A                                     E
But do you ever try to save yourself?
E                                     B
A wild-eyed suicide drive, remains a fake
                                     C#m          G#m
As if you re never, never gonna make that same mistake. . .
```
