

Black Rose
Derdian

Derdian " Black rose

Sorry cause it's not the original pitch, i better like it cause it's easier to play the intro this way. It's a semitone higher, the original one is in G-sharp minor, you can play it for example with capo in the 4th fret, the chords: Em C G D B7, or tune the guitar a half step down.

* slide up 4 frets with the G chord, then palm

** pick up your 2nd finger

This conspiracy but he s too weak
Forever I ll resist against him

Am **F**
Woman, just a black rose
C

** **E7**
That brought you to fall
Am **F**
Let me say weren t wise
C **E7**
It s impossible you know
Am
For your lord to rise
Oh my dear enemy you know

What I just did to your sweet black rose
Died trying to make me fall in love

I found her just one month ago
Suffering and begging in a hole
To be saved and to be nursed

What d you wanna do the next time
Whom you want to send me again?

Woman, just a black rose
This has been your role
That brought you to fall
Let me say weren t wise
It s impossible you know
For your lord to rise

Am **G**
You ll never trick me no way have to rise
F **G** **E7**
And to discover it look in my eyes

Woman, just a black rose
This has been your role
That brought you to fall
Let me say weren t wise
It s impossible you know
For your lord to rise
