I think that s about it. I m doing this from memory =
even though I m listening to the song right now. But =
right now the song is on pause and I don t feel like
switching through applications just to turn it back =
on. Even though it s a really good song. I don t =
know why more younger people don t like them; I mean
I m 14 and I like them - I don t really know anyone

else my age who does, except because they think =

Whip It is funny or something.=
