**Bb**

**Eb**

I ll be there

**Fm** ... (segue o mesmo do começo)

And you can make the earth move

You can take me with no struggle

Lead me through your mystical dreams

Show me what you are

And we can make the wind blow

You re the power and I m in it

You can be the fire I start

I want your heart

And let there be a story when the stories are told

I need to hear you say you love me when the night falls

We may never go to heaven but one thing that is sure

You can not ignore

I ll make it more than

Experience is not imagination

You get what you believe in if you choose

Somebody loves you

I couldn t get no higher

Fly away lovers can share

And we ll be there

Experience is not imagination

You get what you believe in if you choose

And one way or the other

We can find another world we can run away to

And I love you

Experience is only what you make it

You come together when you let yourself go

And somebody loves you

I couldn t get no higher

Fly away lovers can share

And we ll be there
