

**Choo Choo**  
**Diane Birch**

Choo Choo by Diane Birch

posted by eduardopaulo

Really basic song, only three chords. Perfect to fool around with rhythmic patterns and improvise fills.

Intro: **G C D C** x 2 (farfisa)  
**G C D C** x 2 (full band)

**G C D**                    **C**            **G C**  
My baby s got a cherry eye

**D**                                    **C**            **G C D**  
It comes out when the moon is high

**C**            **G C D C**  
When the moon is high

(now do the same chords and the same rhythmic pattern, the lyrics should fit together)

Oh my my baby s got a heart of gold  
But every time the sun goes low oh oh you know the love don t show

(things change a bit here in the bridge)

**D**                    **C**                                    **D**  
Just when I think I m on the road to heaven

**C**                                    **G**  
I see I m only on the road to hell

(again, the **G C D C** sequence in the rhythm you used on the intro and the verse)

The devil s got my baby  
Somebody help me please  
The devil s got my baby  
But I think he s really after me  
Oh my my baby s got a talk so sweet  
But every time the light gets weak  
Oh the promises don t keep  
Thought I was riding on the train to heaven but I m on the choo choo straight to hell  
Chrs.  
The devil s got my baby  
Somebody help me please

The devil s got my baby  
But I think he s really after me  
Oh yeah  
Just when I think I m on my way to heaven  
I see I m only on my way to hell  
Chrs.

The devil s got my baby  
Somebody help me please  
The devil s got my baby but I think he s really after me  
Oh yeah the devil s got my baby  
Oh the devil s got my man  
The devil s got my baby but I know

**G**                                **C**  
I know he really want me (do that as many times as you want)
