[Verse 1]

Some like their dreams to fill their days  
Inside their broken hearts they wait  
The future s fire lights up the grey  
Until the clouds all blow away (I d like to do it)

[Pre-Chorus]

Get up, jump, love, drum up the big strong beat, set up  
One hand on another, don t go slow, you better...  
Get up, jump, love, drum up the big strong beat, and set up  
One hand on another, don t go slow you better...

[Chorus]

There s nothing stronger than us if we can be as one  
It s gonna be a new day my dear  
We ll leave these walls tonight to run, we ve only just begun  
No matter what they all say in fear  
We ll throw these chains off to fly up to the sky  
We ll keep the outside looking in

[Verse 2]

I will be here when they re gone so forget their ways  
We ll leave them all so far away

**C#m** **A**  
With futures caught in disarray  
**G#m** **E**  
And clouds that never blow away (I d like to do it)
