{THE GUITAR: G#m C#m 2x}

Time to put it behind decline lies and the voices  
Thick of the night if you bite its like poison laced with a little bit of sweet

Defeat creep neatly at your feet knees weak then repeat  
You give in cause the feelin your feelin is authentic

Fake but it s realer than the real presented  
Never relents his demented intention

Convincin you the feelin s feelin better than the light of day

But it s only for a limited time and then you find yourself crying in the still of the night

Not right the pain inside

If you search you find light but the blind sight hinder the light yeah but it ought to be taken for reality

We battle and fight the principalities and powers of a similar like

And now the devil been defeated less you give in the fight

B9

So take it back what you ve given cause he aint got the right and now look to the heavens where your help come from

F#

Wait for the morning and the joy will come when the son come-end of the night
