

I Can Stand Still
Don Henley

Intro: **C#m** **B** **C#m** **A**

C#m **B**
I know you love me
C#m **A**
You know I love you too
C#m **B**
You know I always will
C#m **A**
No matter what you do
E **F#m**
You say you haven't got another lover
E **F#m**
You say you only want to make this scene
E **F#m** **G#m**
Then you try to keep it under cover
A
What does that mean

Chorus:

C#m **B** **C#m**
And baby I can't stand still
A
While he's holding you
C#m **B** **C#m**
I can't stand still
A
While he's touching you

So we got a little problem baby
How to put together love and work
If I could figure out that one darling
I could save us from a world of hurt
I remember when we walked together
Making love on a summer night
If we thought that it would last forever
We were all right

Chorus:

But baby I can't stand still
While he's touching you baby
I can't stand still
While he's kissing you

I can take it if you need some freedom
Understand it if you miss your friends
But don't you ever try to think of me some
Never tell me where you been
You say you haven't got another lover
You say you only want to make this scene
Then you try to keep it under cover
What does that mean

Chorus:
