

**Smoke Without Fire**  
**Duffy**

This is really an approximation of what Duffy plays on the piano. I think the actual chords may be a little more complex but this will let you play and sing along.

A note on the verses to this song. In the Dm chords, she is walking the root note down a half step every half-measure - from D to C# to C to B. You can get away with just playing a Dm but if you want the flavor of the original, try to do that. Also, for yet more flavor, you can play an A7 instead of an A chord. Up to you.

Enjoy!
