

**Crash**  
**Eden**

**Am**                      **Em**                      **C**  
It s been a few years since you ve been gone  
**Dm**                      **C**                      **G**  
There s been a few tears, but that was years and years ago  
                         **F**                      **G**                      **Dm**                      **C**  
Yeah, I grew up to be exactly what you wanted  
                         **F**                      **Am**                      **G**  
Yeah, I been living out the dream that you dreamt up  
**Am**                      **Em**                      **C**  
It s been a few years with more to come  
**Dm**                      **C**                      **G**  
It s been a few years since I ve felt sure of what I want

**F**                      **G**                      **Dm**  
And I woke up today and found that you were waiting  
**C**                      **F**                      **G**  
Here for me and I thought  
                         **F**                      **Am**                      **G**  
Woah, old friend it s bittersweet

**F**                      **Am**                      **G**  
How could you do this to me?  
                         **F**                      **Am**                      **G**  
How could you do this to me?

**F**  
Cos you are not who you think you are  
                         **Am**                      **G**  
There s no grain on these brown eyes, but they can be  
                         **F**  
Green if they really want  
                         **Am**                      **G**                      **F**  
And I can bend your words so they say exactly what hurts the most  
                         **Am**                      **G**  
But silence is better than fake laughs or faking were  
                         **F**  
Always up, loose grip  
                         **Am**  
The world bends around you  
                         **G**  
And living through cracked screens  
                         **F**  
We fall fold down to what we want  
                         **Am**                      **G**  
Out of love, we talk through lines, we re made of  
                         **F**  
Smoke

And just in time, we drift away **Am**  
 Diffusing light, confusing times **G F**  
 Growing up, or cascading down? **Am G**  
 Cascading down **F**  
 I m hurting now **Am G**  
 But change comes slow **Dm F**  
 If you hate what s in your head, the fuck would you **Am G**  
 Speak your mind? **Dm**  
 In search of lost time **Em**  
 Just 21 so I m young and I m stupid **F**  
 Only 16, yeah I think you should ve known **Am G**  
 I think you fucked me up **F Am G**  
 I think **F**  
 I think you fucked me up **Am G**  
 And I ve got nothing to say to you **F**  
 It s been a few years and I ve moved on **Am Em C**  
 Couldn t make it disappear, oh I tried so hard to be strong **Dm C G**  
 But I grew up today and faced that I m not just lonely **F G Dm C**  
 Don t feel much better but I guess that it s a start **F Am G**
