

**Cant Shake It Off**

**Elevation**

Elevation aren t very famous in the world but they are so good. This is a tab by ear.

More acoustic than the original. I know it s wrong but it s not bad to listen.

Capo 4

**Em C G D (x2)**

**Em**                    **C**                    **G**                    **D**  
I asked the dawn to rise early this morning

**Em C G D**  
There s a devil in my dreams

**Em**                    **C**                    **G**                    **D**  
She s like an angel in all of her glory

**Em C G D**  
But it s never quite what it seems

**Em**                    **C**                    **G**                    **D**  
She met me when I closed my eyes

**Em**                    **C**                    **G**                    **D**  
Tempting me with a force of nature

**Em**                    **C**                    **G**  
Why would she do this to me

**D** (pause)

Doesn t she know I m in love?

**Em**                    **C**  
She s got a hold on me

**G**                    **D**  
It s like I m staring at the sun

**Em**                    **C**  
And I can barely see

**G**                    **D**  
Where I was coming from

**Em C G**                    **D**  
I m blue and I m black

**Em**                    **C**  
I got this wall to my back

**G**                    **D**  
And I can t shake it off

**Em C G D**

**Em**                    **C**  
So now we re sinking

**G**                    **D**  
Like stones on the water

**Em**                    **C**                    **G**                    **D**

I guess I got in too deep

**Em**                    **C**                    **G**

I let her sit on my throne:

**D** (pause)

Queen deceiver and me

[Chorus x2]
