

**Long Way Down**  
**eleventyseven**

Another Song from this awesome Band I couldn't find.  
This song is originally D# and G#.  
This is designed to be played with the capo on the 1st fret.  
It sounds about 100% correct. But if any comments or corrections, again,  
let me know. Enjoy.

He gave me a map to all his gold  
**D**                    **G**                    **D**                    **G**  
After a lifetime I finally found it

By then I was too old to bring it home

It was a long way down

She had promised me all kinds of kisses  
**D**                    **G**                    **D**                    **G**  
None of them were worth the poems I wrote

It was a long way down

**A**                    **G**                    **D**  
Long way to fall to have nobody catch ya

Long way to call to have nobody answer
