

Meant

Elizaveta

i was really sad to not find any chords for the song anywhere on the internet.
so,
after learning it on the piano, i ve finally got the chords for guitar and i
really hope you find them suitable. i find plucking any four strings (preferably

the bass note and then the highest three) can get you the sound you re looking
for

to match up with elizaveta s piano. this is a pretty simple song.
